

Cyber Security Awareness

Delivered as Lunch n Learn or 2 hour short course

OVERVIEW

KEY FEATURES:

This course will give you an insight to cyber security; the risks in our everyday and business lives, mitigating those risks, determining what we need to protect and how to protect our on line devices from threats.

Course Outline:

- Introduction to Cyber Security
- What is a threat?
- Who is the enemy?
- Why does it happen and why is it relevant to me?
- How does it happen?
- Are you vulnerable?
- Protection for you and your business?
- What can you do if your defences fail?
- How do you manage the risk?
- Summary
- Questions

AUDIENCE

The course is aimed at anyone who is not an IT professional and who needs to be aware of cyber security and how it is relevant to them within the business and at home.

OBJECTIVES

After completion of this course, delegates should be able to:

- Understand why cyber security awareness is important to us all
- Know briefly how to detect if an attack has happened to them
- Be aware of what to do and not do
- Decide how to protect online devices from an attack
- Plan how to recover from an attack
- Determine consequences/penalties of an attack

Further Information

For in-house courses, we can include your current company policies and explain why these measures have been put into place.

*This will require some preparation time at a small additional cost

COURSE FEE: £65.00 per person (discounted for group bookings)
