

Enabling & Managing Office 365 MS20347A

5 Day Official Microsoft Training

OVERVIEW

This is a 5-day instructor-led training course that targets the needs of IT professionals who take part in evaluating, planning, deploying, and operating Office 365 services, including its identities, dependencies, requirements, and supporting technologies.

This course focuses on skills required to set up an Office 365 tenant, including federation with existing user identities, and skills required to sustain an Office 365 tenant and its users. It is divided into 13 modules, each having the support from several labs. Microsoft courseware can be downloaded onto personal devices to accompany this instruction.

KEY FEATURES:

Planning and provisioning Office 365
 Managing Office 365 users and groups
 Configuring client connectivity to MS Office 365
 Planning and configuring directory synchronisation
 Planning and deploying Office 365 ProPlus
 Planning and managing Exchange Online recipients, permissions and Online Services
 Planning and deploying Skype for Business Online
 Planning and configuring SharePoint Online and an Office 365 collaboration solution
 Planning and configuring security and compliance in O 365
 Monitoring and troubleshooting MS Office 365
 Planning and configuring identity federation

This course provides the underpinning knowledge for Exam 70-346 & 347. This should be booked on-line with www.pearsonvue.co.uk

AUDIENCE

This course will provide experienced IT professionals with the training that they need to plan, configure, and manage an Office 365 environment.

OBJECTIVES

After completion of this course, delegates should be able to:

- Plan an Office 365 deployment, configure the Office 365 tenant, and plan a pilot deployment.
- Manage Office 365 users, groups, and licenses, and configure delegated administration; Plan and configure client connectivity to Office 365.
- Plan and configure directory synchronization between Azure AD and on-premises AD DS.
- Plan and implement the deployment of Office 365 ProPlus; Plan and implement the Skype for Business Online deployment; Plan and configure SharePoint Online.
- Plan and manage Exchange Online recipients and permissions; configure Exchange Online services.
- Plan and configure an Office 365 collaboration solution that includes Yammer Enterprise, OneDrive for Business, and Office 365 groups.
- Plan and configure the integration between Office 365 and Azure RMS and configure compliance features in Office 365.
- Monitor and review Office 365 services and troubleshoot Office 365 issues.
- Plan and implement identity federation between on-premises AD DS and Azure AD.
