

Planning and Deploying System Center 2012 Configuration Manager M10748C

3 Day Course

OVERVIEW

This course will equip delegates to plan for the deployment of the central administration sites and all the associated systems. Delegates will also learn how to migrate from System Center 2012 Configuration Manager to System Center 2012 R2 Configuration Manager.

The course is divided into 9 modules, each having the support from several labs. Microsoft courseware can be downloaded onto personal devices to accompany this instruction.

Key Features:

Overview of System Center 2012 R2 Configuration Manager

Planning and deploying a stand-alone Primary Site

Planning and configuring Role-based Administration

Planning and deploying a Multiple-Site Hierarchy

Replicating data and managing content in Configuration Manager 2012

Planning Resource Discovery and Client Deployment

Configuring Internet and Cloud-based Client Management

Maintaining and monitoring System Center 2012 Configuration Manager

Migrating to System Center 2012 R2 Configuration Manager

Exam information:

This course provides some of the information to achieve exam 70-243. Additional learning is provided by M10747D.

AUDIENCE

This course is designed for experienced IT professionals, responsible for designing and deploying System Center 2012 R2 Configuration Manager sites and all supporting systems.

OBJECTIVES

After completion of this course, delegates should be able to:

- Describe the System Center 2012 R2 Configuration Manager infrastructure
- Plan and deploy a stand-alone primary site
- Plan and configure role-based administration
- Plan and deploy a multiple site hierarchy
- Replicate data and manage content in Configuration Manager
- Plan resource discovery and client deployment
- Configure Internet and cloud-based client management
- Maintain and monitor System Center 2012 R2 Configuration Manager
- Migrate to System Center 2012 R2 Configuration Manager

PRE-REQUISITES

Delegates should have working knowledge of Networking Fundamentals; Active Directory Domain Services (AD DS principles; Windows Server; Windows Client deployment, configuration and troubleshooting for Windows-based PCs; basic concepts of PKI and Configuration Manager.

LEVEL: Advanced

COURSE FEE: £1,495.00 per person (includes course notes & refreshments)
