

# Project Management Practice

One Day Course

## OVERVIEW

This short course builds on an understanding of the principles of project management by examining the practical implementation of projects and change as applied in a modern business environment.

Using focused examples and practical scenarios, it offers an excellent opportunity to develop project management skills and techniques to help ensure personal and organisational success.

### KEY FEATURES:

Review project management principles and current business trends.

Examine the role of PRINCE2 and other methodologies.

Personal development as a project manager - key skills required.

Understanding the role of a project sponsor and project board.

Managing a project – business case, scope, key processes and documentation.

Managing risk - identification, appraisal and ownership of risk.

Understand key project management tools - cost estimation, work breakdown, planning and scheduling.

Professional development as a project manager – options available.

## AUDIENCE

This course will be most effective for anyone working or planning to work as a project manager, or as a key project team member, and who wishes to develop their practical project management understanding and capabilities.

## OBJECTIVES

**After completion of this course, delegates should be able to:**

- Understand the role of project management in modern business environments.
- Approach project structure and processes based on an understanding of PRINCE2 methodology.
- Evaluate the theory and practice of key leadership skills to successfully deliver projects and change.
- Use key project management tools and understand their practical application.
- Identify personal and professional development goals to continue progress as a project manager.

## PREREQUISITES

This interactive day requires a firm understanding of project principles and will most benefit those who are interested and involved in projects.

COURSE FEE: £300.00 per person (includes course manuals & refreshments)
