

Provisioning SQL Server Databases v2016 MS20765B

5 Day Course

OVERVIEW

This instructor-led course will provide learners with the knowledge and skills to provision SQL server databases, both on premise and in SQL Azure.

This course is divided into 10 modules, each having the support from several labs. Microsoft courseware can be downloaded onto personal devices to accompany this instruction.

Key Features:

- SQL Server 2016 Components
- Installing SQL Server 2016
- Upgrading SQL Server to SQL Server 2016
- Working with Databases
- Performing Database Maintenance
- Database Storage Options
- Planning to deploy SQL Server on Microsoft Azure
- Migrating Databases to Azure SQL Databases
- Deploying SQL Server on a Microsoft Azure Virtual Machine
- Managing Databases in the Cloud

After the course and some practice, Exam 70 764 should be pre-booked on www.pearsonvue.com

AUDIENCE

This course is designed for those who administer & maintain SQL Server databases or work in environments where databases play a key role in their primary job. It is also useful to those who develop applications that deliver content from SQL Server databases.

OBJECTIVES

After completion of this course, delegates should be able to:

- Provision a Database Server
- Upgrade SQL Server
- Configure SQL Server
- Manage Database and Files (shared)
- Provision, migrate & manage databases in the Cloud

PREREQUISITES

Ideally delegates will need to have basic knowledge of MS Windows operating system; a working knowledge of Transact-SQL; working knowledge of relational databases and some experience of database design.

LEVEL: Intermediate

COURSE FEE: £1,895.00 per person (includes course notes & refreshments)
