

Microsoft Excel Power Pivot

1 Day Course

OVERVIEW

Power Pivot is an Excel based data-modelling application.

This instructor-led training will enable delegates to gather data from multiple data sources, transform and clean data, create relationships between data, perform DAX calculations and to output their data as Pivot Tables or Pivot Charts within Excel.

KEY FEATURES:

- Introducing Power Pivot
- Inserting data
- Transform Data with the Power Query Editor
- Manage Relationships
- Use Data Analysis Expressions (DAX)
- Creating Power Pivot Tables
- Creating Interactive Visual Reports
- Working with Slicers

AUDIENCE

This course is ideal for Excel users who wish to analyse and report information from large data sets. Users who use VLOOKUP or INDEX or MATCH to join data from different tables or worksheets will find this extremely helpful.

OBJECTIVES

After completion of this course, delegates should be able to:

- Understand the basics of Power Pivot
- Work with the Power Pivot Editor
- Connect to Excel, Access, SQL, Word and PDF.
- Use the Power Query Editor
- Create and manage relationships
- Explore DAX and its functions
- Create a PivotTable and PivotChart from multiple related sources
- Use formatting and conditional formatting
- Customise Power Pivot Charts, an Interactive Dashboard and Slicer options.

PRE REQUISITES

Delegates should be confident in using Microsoft Excel in their work.

COURSE FEE: £300 per person (includes course manuals & refreshments)
